

Dream Big

Stratosphere. No other Western Star sleeper has ever been this comfortable. This luxurious. Or this big.

After 400 miles on the road, take off your boots, draw the privacy curtain.

You won't get a better night's sleep anywhere... until you get home.

Stratosphere
Star Light Sleeper

WESTERN STAR TRUCKS

The Stratosphere Sleeper

A Modern Tradition

With Western Star you always get the best of two worlds...the traditional and the unique. The Owner/Operator look and feel that made you fall in love with trucks when you were just a kid. The workmanship you demand. The uniqueness you expect. The quality in every new design.

The Stratosphere Star Light sleeper is the latest example of how Western Star builds today's elite trucks.

Traditional Styling/Modern Engineering

Its external configuration allows for the installation of roof-mounted air horns and marker lights — a styling feature popular among conventional Owner/Operators. They wouldn't have it any other way. Neither would we.

Most of the best news is on the inside, where you work and sleep.

Notice the leg room between the seats. This is the legendary Western Star cab, much bigger inside than other premium trucks. Keep your hat on when you stand up. There's no need to duck. You won't hit your head...not with all that room up there. And the flat floor between the cab and sleeper means you won't trip when you take your first step into the sleeper.

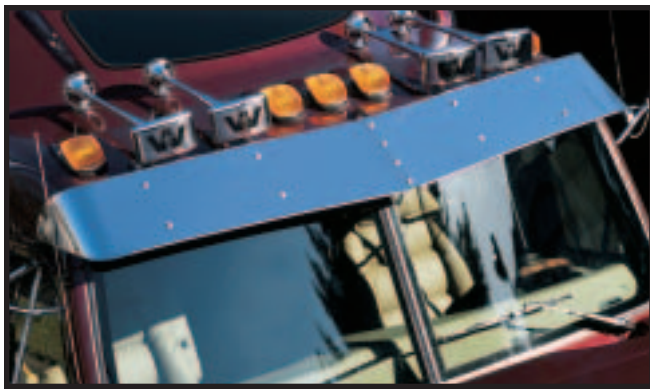

The Master Suite

The best reward for a good day's work is a good night's sleep... in Stratosphere's master suite.

- Run your hand over the rich Phoenix cloth trim (optional).
- Lie down on the optional 48-inch mattress...you won't sleep better than this until you get back home.
- There's more standard room to store things than any two people need.
- Notice the optional digital automatic temperature control.
- Crank up the optional *MBNSOON* stereo system.
- Take in the careful attention to detail, which is Western Star quality.

No other Western Star sleeper has ever been this comfortable. This luxurious. Or this big.

And, for enhanced resale, the Stratosphere sleeper can be easily converted into a day cab.

Stratosphere's traditional design allows for the placement of roof-mounted air horns and marker lights...a popular feature among Owner/Operators.

Wood grain cabinets, including clothes closet with doors plus upper storage areas and dinette seating, are popular premium options.

Stratosphere shown in Phoenix Trim, with wood grain cabinets, deluxe spring mattress and sliding rear glass panel.
